SUMMARY

Results-driven Full-Stack Developer with hands-on experience in designing, developing, and maintaining scalable web and mobile applications using the MERN stack, TypeScript, Flutter, and MySQL. Skilled in building responsive user interfaces, developing RESTful APIs, optimizing database performance, and delivering production-ready solutions in Agile environments. Experienced in cross-platform mobile development with Flutter, API integration, and implementing clean architecture principles to create maintainable and efficient applications.

Proficient in developing full-stack solutions using Node.js, React.js, TypeScript, MySQL, PostgreSQL, and MSSQL, with additional knowledge of Java, Python, and Microsoft Azure. Demonstrated experience in developing service-based applications, logistics platforms, Android WebView solutions, and hardware-integrated systems, including biometric device communication. Strong collaborator with a passion for problem-solving, software quality, and building innovative technology solutions that enhance user experience and business operations.

EXPERIENCE

Software Engineer (MERN)

Kwick High Tech & Solutions (PVT) Ltd

January 2025 – Present, Islamabad, Pakistan

- Developed and enhanced **multiple full-stack web applications** using **Node.js, React.js, TypeScript, and MySQL**, delivering scalable and maintainable solutions for business requirements.
- Designed and implemented **RESTful APIs**, optimized database queries, and improved backend performance to support efficient data processing and application scalability.
- Built responsive and interactive frontend interfaces with **React.js**, enhancing user experience and application usability across devices.
- Developed **Android WebView applications** with JavaScript bridges, enabling seamless communication between native Android functionality and web-based systems.
- Integrated **biometric hardware and native device features** with web platforms, facilitating secure authentication and hardware-driven workflows.
- Collaborated within an **Agile development environment**, working closely with cross-functional teams to deliver high-quality features, resolve issues, and maintain clean, production-ready code.

Flutter Developer Intern

Meta Consultants

October 2024 – December 2024, Faisalabad, Pakistan

- Developed and maintained **cross-platform mobile applications** using **Flutter and Dart**, delivering responsive and user-friendly experiences for Android and iOS platforms.
- Designed and implemented **20+ reusable UI components and screens**, improving development efficiency and ensuring a consistent user experience across applications.
- Integrated **RESTful APIs** and managed application data flow, enabling seamless communication between frontend and backend systems.
- Contributed to the development of **service-based applications** for laundry and curtain cleaning businesses, supporting booking, service management, and customer engagement workflows.
- Applied **clean architecture principles** and coding best practices to build scalable, maintainable, and production-ready mobile applications.
- Collaborated with cross-functional teams to troubleshoot issues, implement new features, and deliver projects within established timelines.

PROJECT

GLOW NOC – Network Operations Center Platform

Kwick High Tech & Solutions (PVT) Ltd. • May 2026 – July 2026

- Architected and delivered a full-stack NOC monitoring platform featuring **51 REST APIs across 45 OpenAPI-documented routes**, supported by a **17-table PostgreSQL database schema** for inventory, metrics, incidents, ticketing, escalation, remediation, and SLA management.
- Designed and deployed a **16-service containerized observability ecosystem** using Docker Compose, integrating Prometheus, Grafana, Alertmanager, NetBox, PostgreSQL, and multiple metric exporters to enable centralized monitoring and infrastructure visibility.
- Developed an intelligent alert correlation engine that consolidated related network faults into single incidents, reducing duplicate alerts and automating ticket generation, notification delivery, and escalation workflows.
- Achieved **sub-60-second fault detection latency** and **sub-3-second API p95 response times**, validated through an automated **20-check end-to-end acceptance testing framework**.
- Implemented **JWT-based authentication**, Role-Based Access Control (RBAC), audit logging, and secure remediation workflows, strengthening platform security and operational governance.
- Built a **9-screen React.js and TypeScript operator dashboard** with real-time topology visualization, performance analytics, SLA monitoring, CSV exports, and dark/light theme support, accompanied by comprehensive API documentation and onboarding resources.

Kwick CRM

Kwick High Tech & Solutions (PVT) Ltd. • February 2026 – May 2026

- Engineered a multi-tenant SaaS CRM platform (React 19/TypeScript, Node.js/Express, Sequelize, MySQL) spanning 28 relational data models across Core CRM, Sales, CPQ, and Billing modules, delivered on a fixed 10-week roadmap as part of a 2–3 developer team.
- Implemented secure multi-tenancy using AsyncLocalStorage-based request context and global Sequelize hooks to auto-scope every database query by organization, validated with a dedicated automated tenant-isolation test suite (Jest/Supertest).
- Built a full CPQ (Configure–Price–Quote) pipeline — Products, Price Books, and Tax Rates feeding a Quote builder with line- and header-level discounts/tax — including asynchronous PDF generation via a BullMQ/Redis worker queue and atomic Quote-to-Order conversion.
- Shipped a Billing module integrating Stripe for online payment checkout alongside Invoice and Payment tracking, closing the revenue loop from quote to cash.
- Delivered enterprise-grade security across 18 REST API route modules, including JWT authentication, bcrypt password hashing, TOTP-based two-factor authentication with QR-code enrollment, rate limiting, and Helmet security headers.
- Developed core sales workflows including a drag-and-drop Kanban deal pipeline (dnd-kit), lead capture-to-conversion tracking, and configurable custom fields with global cross-entity search.

ERP Management System

Kwick High Tech & Solutions (PVT) Ltd • September 2025 – January 2026

- Architected and developed a full-stack ERP system using React 19, TypeScript, and Node.js/Express, delivering 40+ integrated modules spanning HR (Employees, Attendance, Loans, Payroll, Tax) and Finance (General Ledger, Journal Entries, Payments, Receivables, Reconciliation, Budgeting, Financial Statements).
- Designed a dual-database backend architecture using Sequelize (MySQL) and Mongoose (MongoDB) across 44+ data models and 62+ REST controllers to support both relational financial records and flexible document-based data.
- Implemented secure JWT-based authentication and role-based access control, protecting 40+ API route groups and enabling granular permissions across HR and Finance modules for different employee/admin roles.
- Built an Employee Self-Service portal allowing staff to manage attendance, requests, and payroll/experience-letter documents, reducing manual HR ticket handling.
- Automated document and report generation by integrating PDFKit, JSPDF, and Excel (XLSX) export pipelines, plus MJML/Handlebars-based email templates and Nodemailer for automated notifications (e.g., experience letters, payslips).
- Developed interactive finance and HR dashboards with Highcharts and Ant Design, backed by TanStack Query for optimized server-state management, and scheduled background jobs via node-cron for recurring payroll/finance workflows.

Android WebView & Biometric Integration Platform

Kwick High Tech & Solutions (PVT) Ltd. • August 2025 – November 2025

- Developed Android WebView applications that bridged native Android functionality with web-based enterprise systems.
- Implemented JavaScript bridge communication between Android applications and web platforms to enable seamless data exchange.
- Integrated biometric hardware devices for authentication, attendance, and identity verification workflows.
- Developed secure hardware communication mechanisms to support real-time interaction between devices and web applications.
- Enhanced system reliability through debugging, testing, and optimization of native-web integrations.
- Collaborated with frontend, backend, and hardware teams to deliver integrated enterprise solutions.

Curtain Cleaning Service Application

Meta Consultants • play.google.com/store/apps/details?id=com.metadigital.curtain_cleaning&pcampaignid=web_share • November 2024 – December 2024

- Contributed to the development of a cross-platform mobile application for curtain cleaning service management using Flutter and Dart, delivering a shared codebase for both Android and iOS.
- Built responsive Flutter interfaces and a library of reusable UI components, improving usability and maintaining design consistency across platforms and screen sizes.
- Integrated RESTful backend APIs to power booking management, customer interaction, and service tracking features, mapping API responses to typed data models for reliable data flow.
- Implemented asynchronous data handling with Dart Futures and Streams, alongside form validation and structured error management, improving application stability and reducing runtime failures.
- Optimized application performance and user experience through efficient state management, widget rebuild reduction, and lazy-loaded list rendering, resulting in smoother navigation and faster screen load times.

Laundry Service Management Application

Meta Consultants • play.google.com/store/apps/details?id=com.metadigital.laundry_service&pcampaignid=web_share • October 2024 – November 2024

- Developed and maintained **1 cross-platform mobile application** for laundry service management, delivering a **single Flutter codebase** for both Android and iOS platforms.
- Built **15+ responsive screens and reusable UI components**, ensuring consistent performance across multiple device sizes and screen resolutions.
- Integrated **10+ REST API endpoints** for user authentication, service management, booking workflows, order tracking, and customer account functionality.
- Implemented **5+ core business workflows**, including service selection, booking, cart management, order placement, payment processing integration, and order tracking.
- Applied **Clean Architecture** with distinct presentation, domain, and data layers, reducing code duplication and improving long-term maintainability across the application.
- Collaborated with backend developers in an Agile environment, participating in **20+ feature implementations, bug fixes, and API integration tasks** throughout the development lifecycle.

EDUCATION

BE Software Engineering

National University of Science and Technology (NUST) • Islamabad, Pakistan • 2024 • 3.16

- Awarded full Scholarship for 4 years due to grades.

CERTIFICATIONS

Programming with JavaScript

Meta • 2026

- Completed 42-hour course covering JavaScript (ES6+) fundamentals, including functions, objects, arrays, variables, and DOM manipulation
- Applied functional and object-oriented programming paradigms — classes, inheritance, scope, and JSON — and wrote unit tests using Jest

Version Control

Meta • 2026

- Completed 18+ hour course on Git and GitHub, covering repository creation, commits, branching, merging, and remote collaboration workflows
- Practiced Linux command-line operations for file management, applying version control best practices for team-based software development

Introduction to Front-End Development

Meta • 2025

- Completed 19-hour foundational course covering HTML5, CSS3, and Bootstrap for building and styling responsive webpages
- Learned to distinguish front-end, back-end, and full-stack development roles, along with the benefits of modern UI frameworks like Bootstrap and React

Web Design Specialist Certification

UDEMY • 2024

- Completed 10+ hour hands-on training program covering HTML5, CSS3, and Bootstrap framework for responsive web design
- Built and styled multiple webpage layouts using CSS Flexbox, Grid, and Bootstrap components, strengthening front-end design fundamentals

Google Soft Skills Program

Google • 2024

- Completed professional training in Personal Branding, Networking, Time Management, Problem Solving, Critical Thinking, and Professional Communication.
- Strengthened interpersonal, communication, collaboration, and workplace productivity skills in professional environments.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, Python, Dart

Frontend Development: React.js, Next JS, Three.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend Development: Node.js, Express.js, RESTful APIs, Authentication & Authorization, RBAC

Mobile Application Development: Flutter, Android Development, Cross-Platform Mobile Applications

Database Management: MySQL, PostgreSQL, Microsoft SQL Server (MSSQL), Database Design & Optimization

Cloud & DevOps: Microsoft Azure, Git, GitHub, CI/CD Fundamentals
